Kyachingprue Marma

Computer Science | Data Science | Software Engineering

Kyachingpruemarma.info@gmail.com Chattogram Hill Tracts, Bangladesh

TECHNICAL SKILLS

Languages
JavaScript, TypeScript, Python, C++, SQL

Frontend
React, Next.js, HTML5, CSS3, Tailwind CSS, shadcn/ui, GSAP, Motion

Backend
Node.js, Express, REST APIs, JWT authentication

Databases
MongoDB, PostgreSQL, SQL & NoSQL design

Data Science / AI
Python, SQL, PostgreSQL, LLM APIs, prompt engineering, document analysis, AI engineering fundamentals

Computer Science
Data structures & algorithms (C++), OOP, problem solving, databases

Tools
Git, GitHub, Vercel, Postman, VS Code

Practices
RESTful API design, authentication & authorization, responsive design, version control, debugging

EDUCATION

B.B.S - currently enrolled
National University, Bangladesh

MERN Stack Web Development
Programming Hero
Jun 2024 - 2025
Instructor: Jhankar Mahbub

FOCUS AREAS

Computer science fundamentals
Data science & AI engineering
Algorithms & problem solving
Full-stack web development

PROFESSIONAL SUMMARY

Computer science and data science focused developer who started programming in 2024. Completed a full MERN stack program and built and deployed seven full-stack and front-end products, then moved into core computer science: Python, C++, data structures and algorithms, SQL and NoSQL databases, and AI engineering. Combines solid engineering fundamentals with hands-on experience building web apps and AI-powered features. Seeking a software engineering or data-focused role in a good team to contribute to real products and keep learning.

SELECTED PROJECTS

Freelance Job Marketplace
freelance-job-website-client.vercel.app | React, Node.js, MongoDB, JWT
- Built a two-sided marketplace with role-based dashboards for clients and freelancers.
- Implemented JWT authentication, protected routes, and job search, filter and apply flows.

Coding Campus: Programming Course Platform
coding-campus.vercel.app | React, Tailwind CSS, Express, MongoDB
- Developed a course catalogue, learner dashboard and course management views.
- Designed a fast, mobile-first responsive interface.

Mini Book: Social Media App
mini-book-tau.vercel.app | React, Node.js, MongoDB
- Built a social network with posts, likes, comments and user profiles.
- Added secure sign-in and optimistic UI updates for instant feedback.

Green Basket: E-commerce Store
green-basket-website.vercel.app | React, Redux, MongoDB
- Created a storefront with product search, filter and sort.
- Implemented a persistent cart and streamlined checkout flow.

Go Explore: Travel Studio
go-explore-travel-studio-client.vercel.app | React, Tailwind CSS, Node.js
- Built destination and tour-package pages with detailed itineraries.
- Designed a booking-focused, image-rich responsive layout.

AI Document Analysis
ai-document-analysis.vercel.app | Next.js, TypeScript, LLM API
- Built an AI tool that extracts text from uploaded documents and generates summaries.
- Integrated an LLM API for question answering over document content.

Aether AI: 3D Animated Experience
aetheraiwebsite.vercel.app | React, GSAP, Tailwind CSS
- Built an immersive product site with 3D visuals and scroll-driven GSAP animation.
- Optimised animation sequences for smooth performance on mobile.

LEARNING JOURNEY

- **2024** - Started programming: HTML, CSS, JavaScript; joined Programming Hero MERN Stack course (June).
- **2025** - Completed the course, closed knowledge gaps, then learned Next.js, TypeScript, PostgreSQL, Git/GitHub, SQL and NoSQL.
- **2026** - Python, C++, DSA with C++ and an AI Engineering course.
